

# Is YOUR Water Protected??

Whether provided by municipal water or private well, we're concerned about whether there is enough supply to keep our drinking water running AND the projected additional 20,000 people moving here under the Midhurst Secondary Plan.

**Hear our water concerns first hand. Learn how your home and community may be impacted.**

A renowned hydrogeologist, on retainer with the Midhurst Ratepayers' Association, will be presenting his concerns and analysis of the developers' studies on **Wednesday, March 8 at 6:30 pm** at the Springwater Administration Centre on Nursery Road. You will also have an opportunity to voice your concerns to Council about the effects of massive urban sprawl. *Please come - and bring friends and neighbours.*

**If you don't stand up for your water, who will?**
